HOW NICE IT IS TO NOTICE AND ADMIRE OUR WORLD!

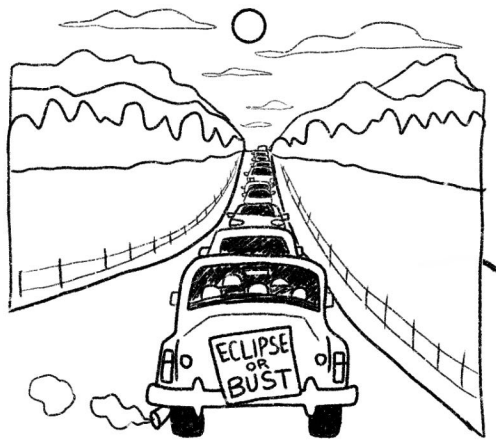

HOW DOES THIS WORK?

THE MOON IS ABOUT 400 TIMES SMALLER THAN THE SUN.
 BUT THE SUN IS 400 TIMES FURTHER AWAY.

WHAT HAPPENS DURING THE ECLIPSE?

IN THE PATH OF TOTALITY THE SKY WILL GO DARK FOR UP TO FOUR MINUTES.
 THERE WILL BE A 360° SUNRISE IN EVERY DIRECTION.
 THE AIR WILL COOL
 CONFUSED BY THE SUDDEN DUSK, BIRDS STOP SINGING, CRICKETS START CHIRPING, AND BEES RETURN TO THEIR HIVES.

ECLIPSE GLASSES ARE NECESSARY IN THE LEAD UP TO TOTALITY
 BUT YOU CAN TAKE THEM OFF DURING TOTALITY WHEN THE SUN IS FULLY COVERED.

MILLIONS OF PEOPLE ARE TRAVELING TO THE PATH OF TOTALITY TO WATCH THE ECLIPSE ON APRIL 8, 2024. VERMONT ALONE IS EXPECTING 200,000 TOURISTS (THE STATE'S POPULATION IS 650,000).
